SMP launches laser-printable films (Mar-20-2012)

SMP launches laser-printable polyester films. The proprietary special coating is applied, so productivity is exceedingly improved with excellent toner adhesion.

There are clear and white films with a couple of different coatings to meet different toners and the thickness range is from 200 to 1000 ga. If you need sheet samples or more technical information, please contact us at info@smpcorps.com or 678-342-1720.
