Whiteboard films are introduced into US market (Jun-01-2012)

SMP whiteboard films are made of white polyester films with special coating of write-on and wipe-off features with dry erase markers. SMP whiteboard films are pressure sensitive adhesive back-coated, so they adhere to painted walls, glass, metal, and wood very well. SMP whiteboard films are very easy to install and uninstall, and can be used at office, school, home and many other places. There are a glossy type and a matte-finished type. A matte finished type can be used for projector screen with write-on and wipe-off features.

Features of SMP whiteboard films

- Flexible whiteboard films
- Excellent and durable write-on & wipe-off with dry erase marker
- PSA back-coated for easy installation and uninstallation
- Projector screen without reflection (matte-finished type)

If you want more information about SMP whiteboard films, please go to 'Products & Details', and if you want some samples, please go to 'Contact'.
