Ultraviolet (UV) stabilized polyester film (New Product)

SKC launched a new type of polyester film to block UV radiation below 370nm Wavelength: Skyrol® TH82U.

TU82U is an optically clear and glossy with chemically treated on two sides.

TH82U provides excellent adhesion to various inks and adhesives, and provides enhanced resistance to UV degradation. It is available at a thickness range of 200ga to 620ga.

For more technical information, please visit 'Polyester Films' section. For samples, please contact us.
