New antimicrobial films are available: Dr. Ag

Dr. Ag is made of silver ions antimicrobial coated polyester film. Silver ions come into contact with the bacteria, blocking their metabolism, leading to their destruction.

Dr. Ag kills four major bacteria 99.99% (Escherichia Coli, Staphylococcus Aureus, Methicillin-resistant Staphylococcus Aureus, Clostridium Difficile) is certified by SGS and Fiti.

Dr. Ag shows excellent clarity (less than 1.0 haze) with clear PSA and strong surface due to special coating for abrasion and scratch resistance. Because of strong surface, Dr. Ag has high durable antimicrobial effects and it is pretty easy to clean (with common window ammonia-free cleaning solutions cleaning solution).

There are matte-finish and gloss-finish versions. In PSA side, there are different choices including permanent with residue-free, air-egress removable and repositionable depending on end user applications. Anti-virus certification is in process.

If you need more information, please type 'Dr. Ag' in our search window or contact us.
