Dr. Ag (silver antimicrobial films) is certified for antiviral and anti-COVID-19.

Dr. Ag? is anti-virus silver film and is effective in killing bacteria and viruses including COVID-19. Dr. Ag? is ISO 21702 certified from an antiviral testing agency in Japan, confirming that Dr. Ag? can kill COVID-19 virus by 99.9%.

Dr. Ag? has excellent durability with scratch resistance coating and the test results done by an outside agency (SGS) show that it can be used for 19 years (cleaned once a week) or 4 years (cleaned five times a week).

Dr. Ag? is made of optically clear polyester films, so they can be suitable for kiosk protection films, sneeze shields protection films, desk/table covers and many other applications.

Dr. Ag? has various product portfolio including three different finishes of clear, matte and silver and three different PSA of permanent, air-egress removable, and air-egress repositionable. Various combinations can be chosen depending on applications.

If you have any questions about Dr. Ag?, please contact us at info@smpcorps.com or 470-359-2111.
