SKC has developed Bio-compostable films under the registered trademark Skywel®.

Skywel® is made of a corn-derived organic material, and is environmentally friendly film with 100% bio-compostability. Also Skywel® is equally sound in its mechanical properties as any PET film.

SKC will expand the bio-compostable film business, and will be continually launching new types of it with other various functions.

* SKC's bio-compostable film Skywel® uses Natureworks' PLA resin.
