SMP is introducing New Easy Peel Lidding Films (EPL) to US and Canada.

SMP is launching new EPL (Easy Peel Lidding) films (DS301P) in North American market.

DS301P has been used in Asian market with very broad applications including yogurt and topu lidding. It is approved for food contact and has excellent characteristics of superior easy peel strength with soft peelability in layer and Good balance between peel strength under various seal temperatures and can be used in Extrusion coating and Dry lamination.

DS301P series are non-oriented easy peel lidding films produced by blown process (3-layer) using multiple resins. DS301P film has excellent heat sealability at low temperature, good peelability, and semi- retortable property. Because of these properties, it shows an excellent effect as a sealant on tray substrate.
